AMERICAN BUSINESS LEADERS BACK BAUCUS EFFORT ON EXTENDERS

Business community rallies around Chairman's fight for extending AMT relief, tax cuts for working families, incentives for businesses and energy independence for America

Washington, DC – More than 300 companies representing different sectors of the American economy are calling on Congress to pass tax legislation by Senate Finance Committee Chairman Max Baucus (D-Mont.) that includes the Research and Development tax credit, the New Markets Tax Credit (NMTTC) and an active financing provision, which allows U.S. companies to defer domestic tax on their foreign earnings. A Senate effort to move toward consideration of the Baucus substitute amendment to H.R. 6049, the Renewable Energy and Job Creation Act of 2008 was blocked yesterday by a vote of 50-44, but a letter this week to all 100 Senators expresses strong support of the Baucus legislation and urges its passage to promote U.S. companies and American competitiveness.

“American businesses are calling on Congress to boost alternative energy jobs and technologies and important tax incentives to facilitate business innovation and improved business operations. American business leaders are rightly concerned about their competitiveness in the global marketplace if Congress doesn’t act now. Failure to extend these provisions in the near term would result in a large tax increase and possibly lead to a shift of even more jobs and business activities overseas,” said Baucus. **“The House has said it will not pass a bill that is not offset. The offsets are provisions that would otherwise benefit the business community and still they support this bill. Business believes this bill will strengthen America’s economy and sustain our economic influence abroad, and I agree with them. For their sake, for the sake of their employees and for millions of working American families, I hope my colleagues will do the right thing and pass this legislation.”**

Other business provisions in the legislation include measures to allow accelerated depreciation of business properties on Indian reservations, expensing costs associated with cleaning up hazardous sites, assisting school districts with low-income populations to save on interest costs associated with public financing for repairs, and enhanced charitable deductions for companies that donate books and computers to schools.

Chairman Baucus noted at a press conference following the vote that he will continue to pursue successful passage of this energy and tax extenders legislation, with these offsets. The full text of the letter follows here:

June 9, 2008

The Honorable Max Baucus
United States Senate
511 Hart Senate Office Building
Washington, DC 20510-2602

Dear Senator Baucus:

The undersigned companies, representing a broad cross section of the U.S. business community and hundreds of thousands of U.S. jobs, request that the Senate take action during the current work period to extend tax provisions that expired at the end of 2007 or will expire at the end of 2008.

The House of Representatives last month passed a tax extenders package included in H.R. 6049, the Renewable Energy and Job Creation Act of 2008, which provides a good starting point for Senate consideration. In April, Senate Finance Committee Chairman Baucus and Senator Grassley introduced S. 2886 containing a tax extenders package, including a critical increase in the Alternative Simplified Credit to spur R&D jobs in the United States. Swift action is now needed by the Senate to enact a tax extenders package that will bring significant positive benefits to the U.S. economy.

Important tax provisions, including the R&D tax credit and the deduction for state and local sales taxes, have already expired. Others, including critical renewable energy incentives, the Subpart F active financial services and look-through rules, the New Markets Tax Credit, and the incentive for domestic film production, expire at the end of this year. Large tax increases would fall on American companies and American workers if the expired and expiring provisions are not extended.

Failure by Congress to move quickly to extend these important provisions will bring investment in renewable energy and energy efficiency projects to a standstill, make it more difficult for U.S. companies to invest in critical R&D projects in this country, reduce private sector investment in business and economic development projects in distressed areas, and force many U.S.-based financial institutions to suffer a massive tax increase at a time when they can least afford it.

Failure to act this summer on tax extender legislation will have significant negative consequences for the U.S. economy. The value of the legislation to the U.S. economy and the need to act quickly at this critical time should be the dominant considerations.

We look forward to working with you on this important legislation and urge action during Congress' June legislative session.

Sincerely,

A. O. Smith Corporation
